

Location Condition Code Default Defense Property Accountability System (DPAS) Warehousing Application

United States Marine Corps
Individual Issue and Unit Issue Facility
(IIF and UIF)

Implementation Training Course

William V. Richardson Jr. and John T. Barrera

Purpose

- To create a Location Condition Code Default.

Background

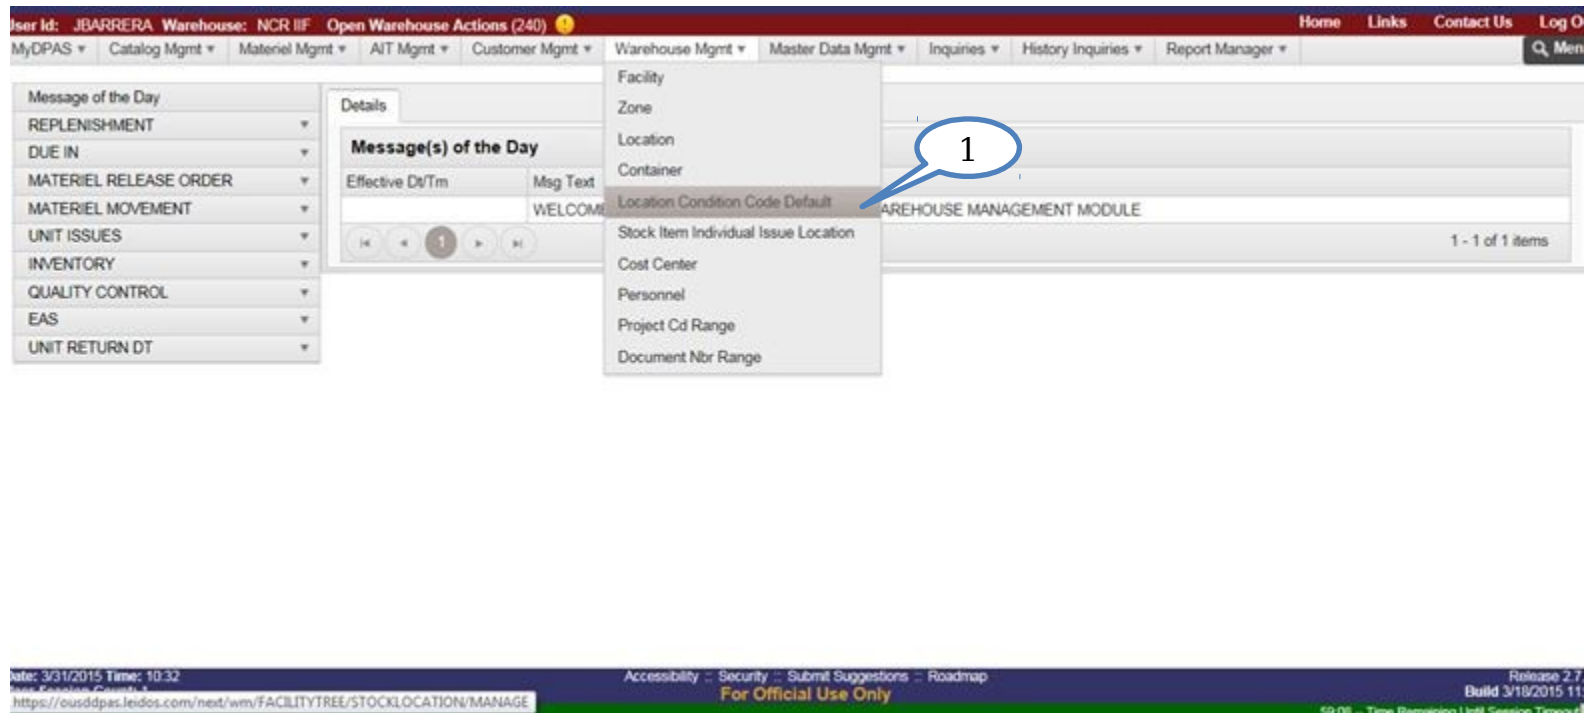

- This default feature is used for items returning back to the Warehouse.
- A default location code saves time.
- Although it is recommended to set a Location Condition Code Default, the creation of this system feature may be delayed to allow ample opportunity in the establishment of location and local procedures.

Situation

As the Site Coordinator, you have been tasked to establish Location Condition Code Defaults.

Location Condition Code Default

Navigate to Warehouse Mgmt tab.
(1) Click on the 'Location Condition Code Default' option.

Location Condition Code Default

The screenshot shows the SAP 'Add Location Cond Cd Default' dialog box. The background window has a menu bar with options like MyDPAS, Catalog Mgmt, Material Mgmt, AIT Mgmt, Customer Mgmt, Warehouse Mgmt, Master Data Mgmt, Inquiries, History Inquiries, and Report Manager. Below the menu is a search bar with a 'Menu' button. The main window has a 'Search Criteria' section with fields for Facility (All), LIN/TAMCN (All), Location Type (All), and Default Container (All). There are also fields for Default Location, Stock Nbr, and Cond Cd. A 'Search' button and a 'Reset' button are at the bottom. Below the search criteria is a table titled 'Location Cond Cd Default' with columns for Facility, Location Type Cd, and LIN/TAMCN. The table has three rows, all with Facility '3169' and Location Type Cd 'Return'. The first row's LIN/TAMCN is 'C0059R - IMTV/PC - CUMMERBUND ADAPTER ASY'. To the right of the table is a '+ Add' button and a 'Grid Options' button. The 'Add Location Cond Cd Default' dialog box is open, showing fields for LIN/TAMCN (K00122F), Stock Nbr (846501D011541), Default Location (Select an Item), Location Type Cd (Select an Item), Cond Cd (Select an Item), and Default Container (Select an Item). There is an 'Add / Edit Remarks' link and 'Add' and 'Cancel' buttons at the bottom.
